FONT INSTALLATION & USAGE GUIDE

HOW TO INSTALL:

Windows**:**
1. Download the font file (usually .ttf or .otf).
2. Right-click the font file and select **Install** or **Install for all users**.
3. The font will now appear in your applications

macOS**:**
1. Double-click the downloaded font file.
2. Font Book will open automatically.
3. Click **Install Font** to complete the installation.

How to Show Special Characters (Alternates / Ligatures)
In Adobe Illustrator / Photoshop:

1. Make sure the font supports OpenType (choose .otf format).
2. Go to **Window > Type > Glyphs**.
3. Highlight the character you want to modify.
4. In the Glyphs panel, alternate versions will be shown. Click one to apply.

Show Special Characters on Windows using Character Map:

1. Open **Character Map** (press Win + R, type charmap, then press Enter).
2. Select the desired font from the dropdown list.
3. Check the **Advanced View** box at the bottom of the window.
4. In the **Group By** dropdown, choose **Unicode Subrange**.
5. From the popup, select **Private Use Characters** (usually at the very bottom).
6. Click the special character you want to use, then click **Select** and then **Copy**.
7. Paste the character into your desired application.

How to Use Fonts on Websites (CMS Based)
Use a plugin such as **Use Any Font** or **Custom Fonts**.

- Upload the font file via the plugin settings.

- Apply the font using the theme customizer or additional CSS.
